Who is IPERICO

The Iperico Social Cooperative Society is a not-for-profit cooperative. It aims to pursue the general interest of the Community in human promotion and social integration. Its work is possible by developing the spirit of mutual aid and solidarity among citizens, through:

- the management of social assistance and educational services;
- carrying out various activities: agricultural, industrial, commercial or service, all aimed at the job placement of disadvantaged people, as per art. 4 of the Italian law 381/91.

Therefore, the cooperative is configured as a "multi-purpose cooperative". The management of socio-welfare and educational services is connected to the professional employment of disadvantaged people. Hiring the unprivileged leads to the overcoming of their isolation and to a new integrative society.

Mission

The residential structures managed by Iperico host individuals of both sexes, with psychiatric pathologies. The purposes are caring, rehabilitation, social work and reintegration of the hosted. The service provided by the employees is pursued through therapeutic and relational interventions. Moreover, it is provided by promoting the improvement of the quality of life and by ensuring the protection and social reintegration of the assisted person.

The reference values

In carrying out the projects, the structure undertakes to respect the fundamental rights of people, ensure the confidentiality of the information and avoid, at all stages of the processing, any form of constraint, guaranteeing the voluntary nature of staying in the structure. Except for cases where the stay is ordered by the judiciary. In such cases, the structure will comply with the precise provisions of the judiciary (according to art. 2 Asur Marche Convention Area Vasta n.2).

Any fact or decision that suggests the intention of the inpatient to leave the facility will be communicated to the sending services (under art. 2 Asur Marche Vasta Area Convention n.2).

The residential structure - general information

The facility welcomes clinically stabilized people who have needs in supporting and maintaining rehabilitation. They are people with marked impairments in self-care, interpersonal skills, economic management and social skills.

The structure carries out therapeutic, rehabilitative and socio-rehabilitative functions of psychiatric competence; useful for - treatment of emergencies, for which hospitalization is not useful; - phases of prolonged assistance following hospital admission; - implementation of medium-long term therapeutic-rehabilitation programs.

Accordingly, the residential facility offers hospitality and assistance through a family-type cohabitation unit. Thanks to the domestic feature of the facility, the cooperative promotes self-management of domestic and social life, solidarity and mutual support attitudes among the assisted.

The staff has a high professional profile, each employee is specialized in his/her area of intervention and has a deep motivation for social work. The requirements for joining the staff are respect and attention for the people assisted and great relationship skills.

The residential structure - purpose and characteristics of the service

Residential structures operational headquarters Monte Roberto (AN), via San Pietro n.3, tel. 0731/704983: "Villa Ricci" (SRP code 3.1.1);

“NIKE Protected Community” (Social rehabilitation SRP 3.1.2).

In residential facilities, continuous assistance is guaranteed as needed

Intervention Areas

The type of offer by the structure is characterized by the implementation of low-intensity rehabilitation programs. The intervention areas are:

- *Clinical psychiatric area*: periodic monitoring of psychopathological conditions and maintenance of clinical stabilization;
- *Rehabilitation area*: it consists of psychotherapeutic programs. The activities are provided directly by the staff, the patient is expected to be involved in the daily activities of the structure;
- *Re-socialization area*: it offers re-socialization interventions, participation in the community, group activities such as leisure, expressive and off-site activities. The latter can be promoted by the structure, but a connection with the territorial social network is also constantly pursued;
- *Coordination area*: periodic meetings with the DSM in charge of the patient, to monitor the social rehabilitation project.

Services

The types of services offered by the structure are the follows:

- **Clinical and therapeutic assistance**, periodic monitoring service of psychopathological conditions, to maintain clinical stabilization.
- **Paths of psychotherapy**: carried out in groups and individually with frequency. Engagement in this setting tends to improve communication among users and the communication between users and the community, to understand the user's mental dynamics both about their past and current behaviours.
- **Health care**, to ensure the health and well-being of the guests. The medical activity of diagnosis and treatment is carried out by General Practitioners, with the intervention of the facility nurses.
- **Educational and rehabilitation service**, through the elaboration of an individualized rehabilitation project, is also aimed at social inclusion (re-socialization).
- **Animation service** and maintenance of expressive and relational skills, thanks to socialization, entertainment, and creativity support, through actions compatible with the psychophysical conditions of each guest (outings in small groups, musical and motor activities, laboratories etc.).
- **Personal assistance service** for the activities of daily life and for the maintenance of autonomy (where possible) which provides support at various times of the day, through the help in personal hygiene.
- **Hotel service**, which aims to guarantee optimal:
 - o Living conditions, the structures are functional and equipped for the different needs of daily life.
 - o Services of catering, laundry, cloakroom, cleaning of the premises. The meals are guaranteed suitable for the types of guests, the menus are designed based on consolidated recipes and methods. The menus assure a plurality of choices attentive to the characteristics of the different seasons and traditional dishes.
- **Maintenance service** is organized internally and with the support of external companies, it ensures a constant check of the facilities, environments and equipment, keeping them efficient.

The professional figures

The figures responsible for guaranteeing optimal welfare standards are the following:

- Health director;
- Psychiatrist;
- General Practitioner;
- Psychologist;
- Psychologist - psychotherapist;
- Professional Nurse (IP);
- Social Health Operators (OSS) social workers in public health services;
- Educational/rehabilitation staff;
- Quality manager;
- Administrative staff.

The professionals involved in direct assistance to guests have the necessary professional qualifications, as required by regional regulations. Personal care activities are ensured, with particular attention to relational aspects, stimulation of residual abilities, reactivation of daily life gestures, and support for socialization also through animation activities.

These peculiar relations are integrated and reinforced by specialized figures who plan and carry out animation activities.
